

merely bringing in compliance and allow us to treat everybody equal. I think that you should adopt this. There is no reason not to. That 100 feet, well, 200 feet that is in the bill right now is just as insignificant a number as 300 feet might be but it was put in there because that will allow a certain facility to be involved. This 300 feet I am offering to you, we are doing the same thing. It is allowing in the future that there could be up to 300 feet. New buildings move. There are buildings torn down and so that it is a situation that could allow someone in the future to have the same opportunity as those that are asking for that prerogative right now. I think it is a reasonable amendment. It is not being put on there, Senator Schmit, in any way to damage your bill. I think that in fact it adds some class to it. I am serious. I think it puts it into a whole situation of allowing the whole state to be treated equally. I am very serious about that, Senator Schmit. I am not offering it to damage the bill. I know you know that so I would ask you to adopt this motion changing it from 200 to 300 feet.

PRESIDENT: You heard the motion. Record your vote. Did you want a record vote on this, Senator?

SENATOR MILLS: I will have to wait a little while.

PRESIDENT: Is this enough?

SENATOR MILLS: It is down the tubes. You have done a fine job, all of those out in the rotunda listening.

PRESIDENT: All right. Record the vote.

CLERK: 12 ayes, 25 nays, 12 not voting.

PRESIDENT: The motion fails. At the rear of the Chamber standing with Senator Orval Keyes is a most attractive young lady from Finland. That is Salme Paukku who is a student at Bryan Sr. High School. Thank you for being here. Welcome to this country. And Bryan High School is not in Senator Keyes' District but I don't understand that.

CLERK: Mr. President, I move to amend LB 77 - Read amendment. (See page 1009, Journal.)

PRESIDENT: Before that, we do have 35 seniors with their three teachers from Nebraska Christian High School in Central City in the South balcony. That is in Senator Kremer's District. Thank all of you for coming. Senator Murphy.

SENATOR MURPHY: This amendment is simply to be a little more specific. We have said that they can now build an attached facility, and I quarrel with the attachment, but nonetheless, they can build an attached facility within 200 feet. Now either we have got to say south, or west, or north, or east or some guerrilla is going to walk in here and say, well, we built one and it is an attached facility even though that makes three. Let's be specific. If we are going to give them the latitude to encroach on other banks, let's limit it to at least one encroachment and say one. That way the Attorney General won't have to render an opinion.
